Overall Objective

To reduce occurrence of AWD and suspected cholera and to minimize the associated morbidity and fatality, through effective prevention and timely response

(Immediate Emergency Response)		(Medium-term Prevention & Preparedness)	
Response Objective (Phase 1)		**Prevention Objective (Phase 2)**	
To respond to the ongoing cholera outbreak to minimize the case fatality rate and prevent further spread of the disease i.e. reduce the current attack rates		To prevent occurrence of an outbreak of Cholera in future through system strenghtening, preventive intervention and adequate preparedness for rapid response	
Emergency Response and Control in Affected Areas (Sword)	Emergency Prevention in At-risk but not yet affected areas (Shield)	Preparedness to respond to future outbreaks	Prevention / Risk Reduction
Specific Objective	**Specific Objective**	**Specific Objective**	**Specific Objective**
To contain the cholera outbreak in affected communities and prevent the disease spread in at risk communities	To prevent cholera to spread to low risk districts	*To be better prepared in case of occurrence of a new outbreak*	*To reduce the risk of occurrence of new cholera outbreaks*
